

Central Bedfordshire Council takes to the roads to tackle potholes

We're taking decisive action to fix potholes by implementing our new highways contract.

In just one month, our contractor Milestone Infrastructure, a part of M Group Services, has completed over 2,000 repairs, including work on potholes, carriageways, footways, and streetlights.

The team has also responded to around 280 emergency call-outs, such as streetlighting and flooding, since the contract started on 1 April 2023.

Residents who notice a new pothole on our road network are asked to report them on [Fix My Street](#), so we can investigate them further and repair them if appropriate.

Any potholes already reported do not need to be reported again. However, in an emergency, dangerous potholes or other safety-related issues can be reported to our highways 24-hour emergency team on 0300 300 8049.
