Hi Christine,

Following on from our site visit to Column A4 in St Peters Avenue, where we refitted the door to the column, we found that the column has been structurally damaged by a vehicle probably reversing into it. (You have the photo I sent you). As a result of this damage, the column requires replacing as the base section has cracked and become unstable.

So to excavate a hole and disconnect and remove the existing column and supply and install 1 x new 6 Metre tubular galvanised steel column, complete with a new Phosco 11 Watt LED lantern and all the required column internal fusing/isolation equipment including UKPN,s works and connection charges, the total cost of install complete with an Electrical Test Certificate and all reinstatement works will be £ 1750.00 +vat, leaving the new column in full working order.

Regards Terry
