Dear Janet

We are working to prepare Central Bedfordshire's new Local Transport Plan (LTP) (a statutory policy document that sets out our strategic vision for transport in Central Bedfordshire), and today begins an engagement period that will help to guide what it includes.

I am writing to you as I believe it may be of interest to you, I attended a briefing session for members last month and I'm keen to get the community engaging, so wanted to make sure you have the opportunity to give your views. The simplest way for individuals and businesses to do this is to [respond online](#). Do please feel free to publicise the opportunity to have your say to anyone else you think may be interested. I've attached a poster you can use on the village notice boards and your facebook page.

If you would rather not respond online, or that approach doesn't suit your organisation or group we have listed some areas we are particularly interested in your thoughts on below:

Your views on possible areas of focus for the LTP, which are:

- Reducing the damaging environmental effects of transport;
- Improving access to jobs and other opportunities associated with new housing and businesses;
- Investing in transport to create better places to live and work;
- Providing extra walking, cycling and public transport capacity; and
- Making transport safer;

Your thoughts on how we can best address these while taking the needs of the people you represent into account;

Your perception of the issues our LTP should deal with, and any preferred solutions;

Any proposals for schemes/interventions that you believe should be included; and

Any relevant data or evidence you may hold.

If you are able to provide your response by Sunday 30 June, this would be greatly appreciated. If you have any questions, please don't hesitate to get in touch via email at strategic.transport@centralbedfordshire.gov.uk

Yours sincerely

Jodie
